

GEMS AND MINERALS IN THE MCFERRIN FABERGÉ COLLECTION:

A STUDY

Presented by

Christel McCanless, Annemiek Wintraecken, and Tim Adams

Fabergé International Symposium

Houston, Texas

January 31, 2013

Organic Materials from Trees and the Oceans

Gems and Minerals Mined from the Earth

**Rock Stars Demonstration Team, Houston Museum of Natural Science
Tours – Cullen Hall of Gems & Minerals and the Smith Gem Vault, Docents**

All illustrations are courtesy of the Artie and Dorothy McFerrin Collection, unless otherwise noted.

Fabergé Sorting Loose Stones

ca. 1915

- 1908 Lapidary workshop at 44 Angliskii Prospekt, St. Petersburg, employing 30 craftsmen by 1912.
- Hardstone animals and Russian folkloristic figures are not always marked Fabergé, unless they have added gold or silver decorations.
- Study goals: Gem and mineral identification and discovery of historical details.

Brown Agate, 18 ct. gold, diamond eyes,
H.W.  Henrik Wigström (1862-1923)
(The Hodges Family Collection)

Milky White Agate, Onyx or Chalcedony?

I. Organic Materials from Trees and the Oceans

Karelian Birch – Hard wood with bulbous growth, caused by a genetic defect of a tree growing in a sub-arctic climate

Silver Birch
(Wikipedia)

Karelian Birch Cigarette Case
with Souvenir Appliques
(not by Fabergé)

Insights on the Appliques:

Possibly a present from a woman closely connected to the man on the photo, perhaps a soldier going back to the battlefield after a vacation in July 1915 ...

Presented by Lyusya Messalineta, possibly a diminutive version of name Messalina, who was famous for her flirtations.

Phrases: *Nice fellow, I am I, don't pay attention, let's forget it together, we shouldn't reason ...*

Symbols: In fan language an open fan may mean *Wait for me*, a fly is a symbol of sin, a fir tree is a symbol of bravery, courage, fidelity and immortality ...

(Courtesy of Galina Korneva and Tatiana Cheboksarova)

Palisander (Rosewood) – Hard dark, black-streaked wood from Brazil

Palisander Cigarette Case with Empress Elizabeth Petrovna of Russia (1741-1762) Coin

II. Gems and Minerals Mined from the Earth

Geographic Mining Locations and Karelain Birch Forests (Wikipedia)

Mining in the Ural Mountains, 1910

Photograph by Sergey Prokudin-Gorsky (Wikipedia)

Mohs Scale of Hardness characterizes the scratch resistance of various minerals through the ability of a harder material to scratch a softer material. [Legend: Average Range Values from the Mohs Scale, Geographic Mining Locations]

GOLD [2.5 Ural, Caucasus, and Altai Mountains in Russia, Siberia]

Multi-colored golds – alloying of gold with other metals to change the natural yellow color:

- Green = 75 parts of pure gold + 25 parts of silver
- Red/rose = 75 + 25 copper
- White = platinum, palladium, nickel, silver, chromium, and zinc are used to "bleach" gold white
- Yellow = gold, copper, and silver, often 80 gold/20 copper/silver

(Lowes and McCanless, [*Fabergé Eggs: A Retrospective Encyclopedia*](#), 2001, 275)

Imperial Presentation Case with "Samorodok"
(Gold as it is born), 56 standard (14 ct.)

SILVER [2.5 Ural, Caucasus, and Altai Mountains in Russia, Siberia]

Chasing and Repoussé – Jeweler's technique of adding intricate details to metals by working the front (chasing/drive out) and the reverse of an object (repoussé/push up) with very fine tools.

Silver Red Cross Box (pre-1912)

Widow's Mark for Anna Ringe (1832-1912), Widow of Independent Workmaster Theodor Ringe (1824-1882)

BOWENITE [3 Ural Mountains in Russia, Siberia, Afghanistan, China, USA] often mistaken for jadeite or nephrite. Named after G.T. Bowen, an American mineralogist, who identified the mineral as part of the serpentine family.

1892 Diamond Trellis Egg,
Gift to Marie Feodorovna
from Emperor Alexander III

MOTHER OF PEARL/PEARL [3.5, organic material discussed above, pearl is the birthstone for June]

PLATINUM [4 Ural Mountains in Russia]

Platinum: 10 Tons of Ore + ca. 5 Months of Labor = 1 Ounce of Pure Platinum

RHODONITE [6 Ural Mountains in Russia, Siberia] also known in Russia as 'orletz', the name comes from the Greek word *rhodo* meaning pink, state gem of Russia in 1913.

Natural Rhodonite (Wikipedia)

- Frost-Mounted rhodonite card (or cigarette) case with French inscription, *L'amitie vous l'offre* (Friendship offers you this) based on a Wigström design sketch, production number 12581, completed on October 28, 1911.
- The case has a St. Petersburg inventory number of 21771, purchased by Lady Arthur Paget in London on November 20, 1912, for £68.

Owners thru the ages:

- Lady Arthur Paget (Mary Fiske Stevens (b. 1853-1919), known as Minnie, the daughter of a wealthy Boston hotelier, was one of Fabergé's first patrons in London. She arranged an exhibition of his wares at a bazaar held at Albert Hall on June 21-23, 1904.
- Lansdell K. Christie (1903-1965), mining industrialist, philanthropist, and collector of Fabergé
- Artie and Dorothy McFerrin in 2012

QUARTZ and its varieties [7 Russia, world-wide] are the world's most abundant minerals in a rainbow of colors, and are the basic materials for the glass and ceramic industries.

Faceting – Fashions a stone by cutting its surface into a number of flat faces, or facets.

Gem and Mineral Handles in the McFerrin Collection:

- “... *parasols and walking-sticks carried by Russian ladies and gentlemen of discrimination were generally topped by one of the exquisite conceits from Fabergé’s.*” (A. Kenneth Snowman, Wartski, London)
- Defined by the width of the mount - parasols usually have very fine stems since they were not required to take the weight of the owner, however, canes were. (Geoffrey Munn, Wartski, London)

by Nicholas II and Alexandra Feodorovna in 1901 for 215 rubles.

Enameling – powdered glass with metal oxides € metal (gold/silver) € fired at 600-800° Celsius (1300° Fahrenheit) = hard glossy finish in rainbow colors

Varieties:

Opalescent (rich, milky appearance)

Opaque (so dense light cannot penetrate)

Translucent (allows light to shine through the new material, 600° best results)

Enamel Firing Furnace (Wartski, London)

Moiré-Patterned Cigarette Case

Guilloché – Engraving of repetitive patterns on the surface of a metal € firing process of several layers = translucent enamel

Patterns: *Moiré* (water-like pattern), sun-rays, and swag pattern

The Zenith of the Russian Art of Hardstone Carving –

Russian Folkloristic Hardstone Figures (Wartski, London)

Compilers: Christel McCanless, Annemiek Wintraecken, and Tim Adams have a research study underway on 50 rarely seen Russian folkloristic hardstone figures made by the Fabergé firm after 1908, and eagerly collected by Emperor Nicholas II. We enjoy working as a team located on the two coasts of the United States and in The Netherlands! Contact: christel@fabergéresearch.com

Our thanks to:

- **Artie and Dorothy McFerrin for allowing us to study their collection**
- **Carlton and Martha Els, C&M Photographers**
- **Kimberly Breiland, 22 Graphics, Inc.**
- **Lisa Rebori, Amy Potts and Daniel Burch, Houston Museum of Natural Science**
- **The organizations credited individually who shared their images, and Inda Immega and Jill Moffitt, who encouraged us to learn about their gem and mineral passions.**
